

General policy on the use of non-distributable amounts, as recommended by Koda's Board for the General Assembly's adoption on 26 April 2023 (unaltered)

1. Koda works diligently to distribute all amounts to rights holders

Koda performs every practically possible and not infeasibly costly effort to identify the rightholders of works used under Koda's agreements.

In situations where this search is futile even though all known rightholders and foreign affiliates have been informed Koda will publish a call to all rightholders via koda.dk, asking the relevant rightholders to come forward.

2. Koda's general policy on the use of non-distributable amounts

Amounts that cannot be distributed individually in accordance with the above are classified as non-distributable after the elapse of three years.

Koda then distributes the non-distributable amounts among the rightholders by recycling each non-distributable amount within the same distribution area, e.g. from one TV channel to the same or similar TV channels, or by establishing a specific representative analogous reporting base.

Amounts may be classified as non-distributable when, after three years, it appears that

- a) establishing a useful reporting base is not legally or practically possible or would be excessively costly,
- b) notification of the work has not been clearly and unambiguously made to Koda, or
- c) the rightholder cannot be located.
